

**Test on sales rep  
phone**

# 1. I logged into her phone and checked for battery accuracy. It did not match this time.

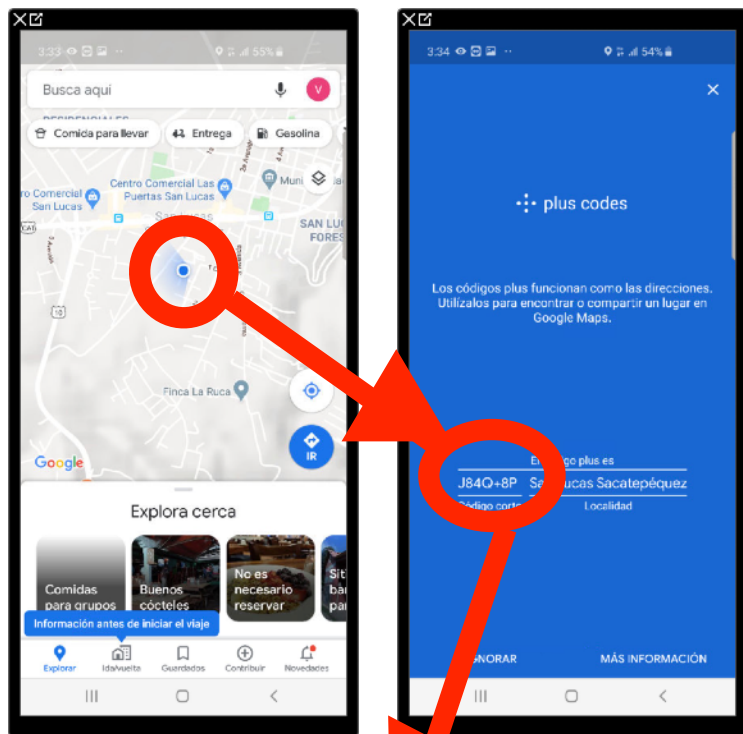

Nombre	Teléfono	Correo Electrónico	IMEI	Visita Anual	Batería	Visto Por Primera Vez	Supervisor	Acción
Louisa Jennifer Ortega Rivera	54136709	jenny.ortega@qualipharm.info	351912103045416	200	100	2020-07-02 07:59:55	Carolina Rogel Marcus	 

Mostrando 1 to 1 of 1 entries (filtered from 30 total entries)

Anterior 1 Siguiente

Even when the battery was not at 100%, 56% is not a range low enough to trigger a battery saving scheme.

## 2. I checked the localization information, and still did not match with the backend.

I matched the information that the phone gave me regarding location, and found the coordinates. Those did not match with the coordinates in the back end, at the moment of the test.

These backend coordinates had been like this since the morning. I performed the test at 3PM.
